

MELTIO

Meltio M600

Industrial Metal 3D Printer

Why Choose Meltio M600?

1. Production Ready

Bigger parts, higher deposition rate, larger material range, inert print chamber, less maintenance, and built-in workholding solutions make for a production ready system.

2. Ease of Use

Advanced sensor solutions, simplified UI, dedicated slicer, zero point clamping system, and probe system. All designed to minimize operator interaction.

3. Reduced Maintenance

The newly developed deposition head removes the need for laser alignment, while the motion system has been improved and over-sized to ensure maximum life-time.

4. Stability, Repeatability, Reliability

Improved wire feeding system, fiber free deposition head, improved process control systems, and many more making for an extremely reliable machine.

5. Automated Integration

Integrating the system into existing manufacturing workflows becomes easy thanks to the compact footprint and flexible workholding architecture.

6. Increased Working Volume

Fully inert printing volume of 300 x 400 x 600 mm expands manufacturing possibilities to larger components while improving the quality for highly reactive materials like titanium.

7. Cost Saving

Thanks to the high efficiency Blue Laser diodes and the increased absorption, the energy consumption per component is reduced significantly, resulting in a greener and more cost efficient process.

Technical Details

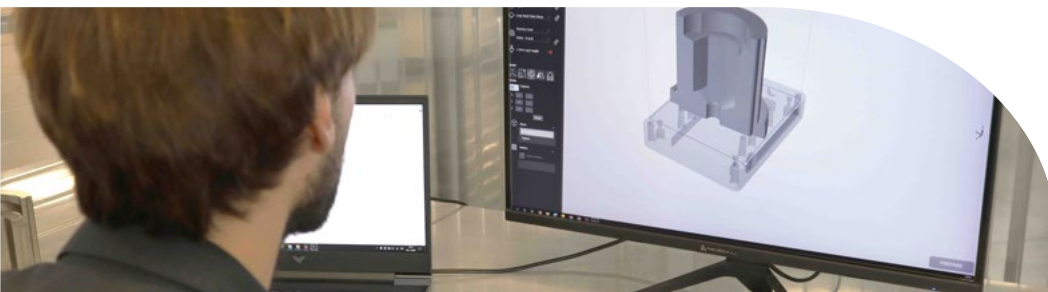

Dimensions (WxDxH):	1050 x 1150 x 1950 mm	Total Laser Power:	1000 W
Build Envelope (WxDxH):	300 x 400 x 600 mm	Power Input:	400V Three Phase
System Weight:	800-1000 kg (depending on options)	Power Consumption:	4-6 kW Peak Depending on selected options
Movement System:	Servo Motor Linear axis with Absolute encoder on all axis	Process Control:	Closed Loop, Laser and wire Modulation
Filtration System:	3 Stage Particulate and Chemical Filtration included	Touch Probe:	Automated XYZ Touch Probe integrated
Environment Control:	Control O2 and Humidity level	Enclosure:	Laser safe, Controlled inert atmosphere
Laser Type:	9x Direct Diode Lasers	Interface:	USB, Ethernet, WiFi
Laser Wavelength:	450 nm (Blue)	Cooling:	Active water-cooled chiller included
		Wire Feedstock:	Diameter: 0.8-1.2 mm / Spool Type: BS300 External wire drum ready

Meltio Horizon

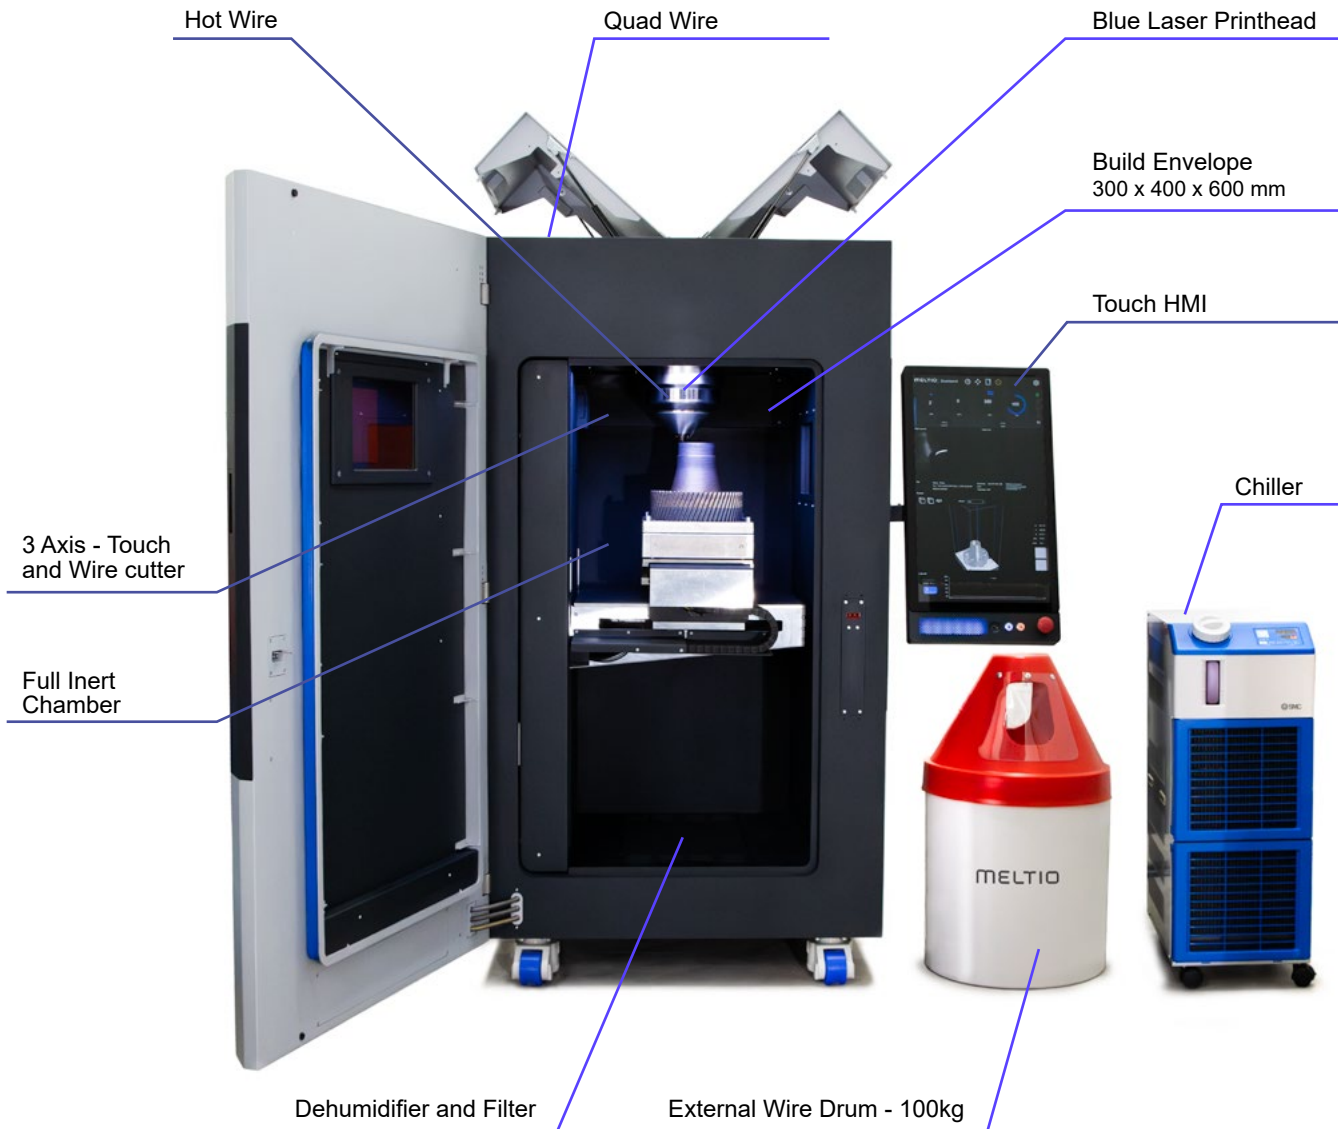

Metal 3D Printer Slicer

Meltio Horizon is a proprietary toolpath generator software for 3-axis metal 3D printing, tailored specifically to our laser-wire deposition process with the Meltio M450 and Meltio M600 metal 3D printers.

Simpler profile selection and premade profiles that cover a large range of geometries and qualities.

Meltio M600 Configuration

Blue Laser

1. Blue Light

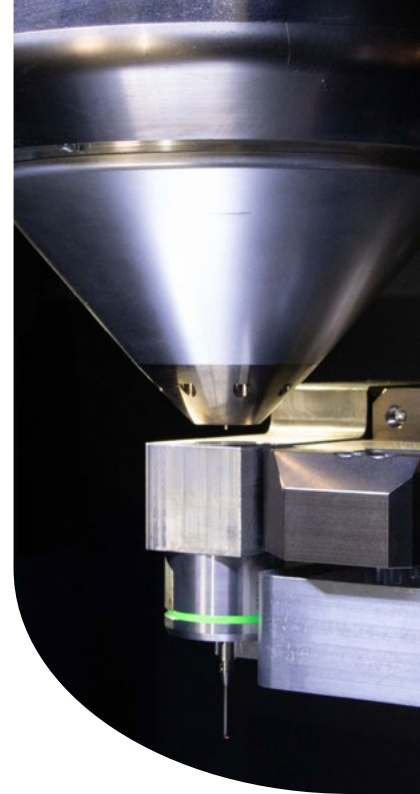

450 nm light improves energy absorption and printing efficiency across the metal material spectrum and opens new material possibilities.

2. Hotwire Compatible

The deposition head is developed for use with an optional hotwire supply to increase the deposition rate and allow for more materials to be processed.

3. No Calibration

The new head doesn't require calibration between material changes and arrives aligned from the factory for maximum printing repeatability and minimal maintenance.

Material and Feeding System

1. Aluminum and Copper Ready

The Meltio M600 is compatible with steel, carbon steel, nickel, titanium, aluminum and copper based alloys.

2. Dual and Quadruple Wire

Options for printing with up to four different materials in the same print sequentially with the reliability of a single wire process.

3. Wire Drum Ready

The wire drum connector allows for a reliable and industrial feeding system for material spools of +100kg.

4. Hot Wire

Programmable power supply that preheats the material to increase the deposition rate.

Expand your manufacturing capabilities with Blue lasers, a large build volume, and a fully inert chamber for the best material properties. Printing is easier than ever thanks to the improved process control, advanced sensors and live monitoring allowing you to produce parts consistently 24/7.

The Meltio M600, with its built-in 3-axis probing system and work-holding solutions, is the ideal companion for your manufacturing operations.
